## Resources and Guidance on

# Finding a Job in Political Science

Hundreds of academic positions are advertised each year in political science. Finding the openings is the easy part; knowing how to approach the application and interview process is a little more challenging. At APSA, we have collected resources to assist candidates in the academic job search. We would like to highlight a few of these key resources here. The complete list of job resources is available online at [www.apsanet.org/jobs](http://www.apsanet.org/jobs).

**eJobs:** This online resource contains comprehensive online listing of political science jobs, is updated daily with new job listings and candidate resumes, and is fully searchable by field of interest, name of employer/candidate, region, keyword, position, salary, type of institution, and most recent posts.

**Data on Jobs Market:** APSA gathers and releases data regarding the placement of political science Ph.Ds. View this information at [www.apsanet.org/content\\_7623.cfm](http://www.apsanet.org/content_7623.cfm).

**Mentoring:** Enroll in the APSA Mentoring Program online at [www.apsanet.org/mentoring](http://www.apsanet.org/mentoring).

**eJobs Placement Interview Services:** The eJobs Annual Meeting Placement Interview Service provides space and facilities for employers who have eJobs posted to interview candidates at the APSA meeting. Many other conferences, such as the Northeastern and Western, also use the APSA online service to schedule placement interviews. Check the listings online in eJobs.

**Ethics Guide:** The *APSA Guide to Professional Ethics in Political Science* includes specific guidance on hiring and employment practices. Order a print copy or view online at [www.apsanet.org/ethics](http://www.apsanet.org/ethics).

## University of Chicago

**Rank: Research Associate – Race and Capitalism Project**

The National Race and Capitalism Project invites applications for a Research Associate based at the University of Chicago. This is a full-time research position beginning September 2019 with a one-year term, renewable upon satisfactory performance review. The salary (nine months) and benefits are competitive.

To be eligible, candidates must have received their PhD within the previous five years or be on track to complete a PhD in a social science or humanities field prior to the start of this position, and have a research agenda that examines the intersection of race and capitalism.

The Race and Capitalism Project is a multi-institution collaboration housed in the Department of Political Science at the University of Chicago. The project seeks to reinvigorate, strengthen, and

deepen scholarship on how processes of racialization shape capitalist society and economy and how capitalism simultaneously shapes processes of racialization. This project was initiated and conceived at the Center for the Study of Race, Politics, and Culture (CSRPC) at the University of Chicago, and the Washington Institute for the Study of Inequality and Race (WISIR) at the University of Washington. Central questions included: 1) What is the relationship between racial and economic inequality; 2) How has the relationship between various racial and ethnic groups, the economy, and civil society changed over time; and 3) What theoretical approaches to the studies of capitalism and race best explain the empirical reality of 21st century capitalism. Key goals included: increasing collaboration between scholars across disciplines; advancing the state of scholarship on race and capitalism; and where appropriate, highlighting key findings from the project for use in public discourse.

The Research Associate will take a leading role in coordinating the program and will participate with the project staff, the faculty director, and a predoctoral fellow in formulating a long-range vision for the project as well as implementing the plan for the year. ### COMPARATIVE POLITICS

#### University of Pennsylvania

**Rank:** Lightning Scholar

The Global Innovation Program at the University of Pennsylvania's Perry World House invites applications for its 2019-2020 Lightning Scholars Program. This program brings untenured, but tenure-track, faculty at either the assistant or associate level from around the world to Philadelphia for a semester or year of writing, fellowship, and bridging the gap between academia and the policy world.

Since launching in 2016, Perry World House has catalyzed interdisciplinary and policy-relevant research by scholars at Penn and around the globe and convened conversations in Philadelphia on the most pressing global challenges. With its post-doctoral fellowships, Distinguished Visiting Fellows, and Visiting Scholars programs, Perry World House has connected Penn's students and faculty with the world's leading academics and policy makers, infusing our research, teaching

and, engagement with the ideas, wisdom and experience of those shaping world events.

This new fellowship program will allow untenured faculty members at leading research universities around the world to join Perry World House and the Penn community for a semester or full academic year in residence in Philadelphia to produce a major research project or book. While the fellowship program is for faculty working on global affairs topics, preference will be given to faculty working on subjects broadly related to our two research themes, *The Future of the Global Order: Technology, Power and Governance* and *Global Shifts: Urbanization, Migration, and Demography*. More information on our research themes can be found here: <https://global.upenn.edu/perryworldhouse/research>.

The ideal candidates for this new program will be looking for an in-residence fellowship away from their home institution that will provide the space and support to write, but also the opportunity to collaborate with an interdisciplinary and vibrant community of global affairs scholars and practitioners. Perry World House is especially interested in faculty whose work connects to important global policy conversations and who will want to engage in dialogue with some of the many policymakers from around the world who visit Perry World House. The program's compensation is significant and negotiated on a case-by-case basis. The program is intended to allow the selected Lightning Scholar faculty member to take a comfortable leave from their home institution often by supporting the difference between a one semester sabbatical provided by the home institution and a full year leave. Although final compensation will depend on the circumstances of each applicant, the program will provide at least \$50,000 as well as relevant fees and health insurance, if needed. The fellowship will also include \$5,000 in research support, as well as the opportunity to help shape workshops and colloquia at Perry World House.

Applications, which should be submitted via Interfolio, are welcome from scholars who have either a Ph.D. or equivalent degrees (including a J.D.), are standing faculty members at a college or university, and are on the tenure track but still untenured. ### Princeton University

**Rank:** Fung Global Fellows Program - Early Career Scholar Fellowship

**Subfield(s):** Comparative Politics, International Relations, Other

Princeton University is pleased to announce the call for applications to the Fung Global Fellows Program at the Princeton Institute for International and Regional Studies (PIIRS). The program will select early-career scholars from around the world to be in residence at Princeton for an academic year and to engage in research and discussion around a common theme. The number of candidates hired at this rank will depend on the qualifications of the overall applicant pools. The fellowships will be awarded to scholars employed outside

the United States who have a faculty appointment, a professional research appointment, or are an established independent scholar. They will also be expected to return to their positions at the conclusion of the fellowship. Lastly, they must have demonstrated outstanding scholarly achievement and unusual intellectual promise.

During the academic year 2019-20, the Fung Global Fellows Program theme will be “Thinking Globally.” How people have thought about the planet has informed the institutions, norms, and policies that have pulled it together and torn it apart. For centuries, ideas of free trade, human rights or global governance have framed cooperation and competition, order and disorder. Such ideas have also spawned border-crossing movements, from campaigns to end slavery to commitments to reduce carbon emissions. In turn, global thinking and action have often reinforced commitments to national ideas and efforts to curb global exchange. The goal of this research theme is to explore how ideas framed the understanding of interests and the making of institutions that have yielded commonness and conflict across and within borders. We also want to understand how these ideas and practices came into being through scientific networks, foundations, and think tanks. The Program will also examine rival world ideas that have challenged prevailing orthodoxies. Nowadays, with cooperative norms under challenge, global institutions under stress, and a century of guiding ideas about global convergence in doubt, we want to take a broad look at where these ideas came from, their effects, and the prospects for intellectual renewal or rethinking. The goal of the 2019-20 Fung Global Fellows cohort will be to explore the ways people learned to rely on or to reject strangers far away, as well as to imagine how global relationships came to be and could be different. We welcome applicants from all disciplinary and inter-disciplinary fields from the sciences to the humanities whose work addresses this set of themes in any historical period or world region.

Applicants must apply online at <https://www.princeton.edu/acad-positions/position/9481>.

Applications are due by November 20, 2018 (11:59 p.m. EST). To be eligible, applicants must have received their Ph.D. or equivalent no earlier than September 1, 2009. Fellowships will be awarded on the strength of a candidate's proposed research project, the relationship of the project to the program theme, the candidate's scholarly record and ability to contribute to the intellectual life of the program. For more information on eligibility requirements and the Fung Global Fellows Program see <http://piirs.princeton.edu/funggf/>.

The following items will need to be submitted by the applicant, in English:

- Cover letter (1.5 pages maximum)

## Princeton University

**Rank:** Fung Global Fellows Program – Senior Scholar Fellowship

**Subfield(s):** Comparative Politics, International Relations, Other

Princeton University is pleased to announce the call for applications to the Fung Global Fellows Program at the Princeton Institute for International and Regional Studies (PIIRS). The program will select senior scholars from around the world to be in residence at Princeton between three to ten months during the 2019-2020 academic year to engage in research and discussion around a common theme. The number of candidates hired at this rank will depend on the qualifications of the overall applicant pools. The fellowship will be awarded to senior scholars employed outside the United States who have received their doctorate before 2009. They must have a faculty appointment, a professional research appointment, or be an established independent scholar in the designated theme of the program, and have exhibited unusual intellectual promise. Senior candidates will be expected to return to their position after the conclusion of the fellowship.

During the academic year 2019-20, the Fung Global Fellows Program theme will be “Thinking Globally.” How people have thought about the planet has informed the institutions, norms, and policies that have pulled it together and torn it apart. For centuries, ideas of free trade, human rights or global governance have framed cooperation and competition, order and disorder. Such ideas have also spawned border-crossing movements, from campaigns to end slavery to commitments to reduce carbon emissions. In turn, global thinking and action have often reinforced commitments to national ideas and efforts to curb global exchange. The goal of this research theme is to explore how ideas framed the understanding of interests and the making of institutions that have yielded commonness and conflict across and within borders. We also want to understand how these ideas and practices came into being through scientific networks, foundations, and think tanks. The Program will also examine rival world ideas that have challenged prevailing orthodoxies. Nowadays, with cooperative norms under challenge, global institutions under stress, and a century of guiding ideas about global convergence in doubt, we want to take a broad look at where these ideas came from, their effects, and the prospects for intellectual renewal or rethinking. The goal of the 2019-20 Fung Global Fellows cohort will be to explore the ways people learned to rely on or to reject strangers far away, as well as to imagine how global relationships came to be and could be different. We welcome applicants from all disciplinary and inter-disciplinary fields from the sciences to the humanities whose work addresses this set of themes in any historical period or world region.

Applications are due by November 20, 2018 (11:59 p.m. EST). Fellowships will be awarded on the strength of a candidate's proposed research project, the relationship of the project to the program theme, the candidate's scholarly record and ability to contribute to the intellectual life of the program.

## INTERNATIONAL RELATIONS

### University of Pennsylvania

**Rank:** Lightning Scholar

The Global Innovation Program at the University of Pennsylvania's Perry World House invites applications for its 2019-2020 Lightning Scholars Program. This program brings untenured, but tenure-track, faculty at either the assistant or associate level from around the world to Philadelphia for a semester or year of writing, fellowship, and bridging the gap between academia and the policy world.

Since launching in 2016, Perry World House has catalyzed interdisciplinary and policy-relevant research by scholars at Penn and around the globe and convened conversations in Philadelphia on the most pressing global challenges. With its post-doctoral fellowships, Distinguished Visiting Fellows, and Visiting Scholars programs, Perry World House has connected Penn's students and faculty with the world's leading academics and policy makers, infusing our research, teaching and, engagement with the ideas, wisdom and experience of those shaping world events.

This new fellowship program will allow untenured faculty members at leading research universities around the world to join Perry World House and the Penn community for a semester or full academic year in residence in Philadelphia to produce a major research project or book. While the fellowship program is for faculty working on global affairs topics, preference will be given to faculty working on subjects broadly related to our two research themes, The Future of the Global Order: Technology, Power and Governance and Global Shifts: Urbanization, Migration, and Demography. More information on our research themes can be found here: <https://global.upenn.edu/perryworldhouse/research>.

The ideal candidates for this new program will be looking for an in-residence fellowship away from their home institution that will provide the space and support to write, but also the opportunity to collaborate with an interdisciplinary and vibrant community of global affairs scholars and practitioners. Perry World House is especially interested in faculty whose work connects to important global policy conversations and who will want to engage in dialogue with some of the many policymakers from around the world who visit Perry World House. The program's compensation is significant and negotiated on a case-by-case basis. The program is intended to allow the selected Lightning Scholar faculty member to take a comfortable leave from their home institution often by supporting the difference between a one semester sabbatical provided by the home institution and a full year leave. Although final compensation will depend on the circumstances of

each applicant, the program will provide at least \$50,000 as well as relevant fees and health insurance, if needed. The fellowship will also include \$5,000 in research support, as well as the opportunity to help shape workshops and colloquia at Perry World House.

Applications, which should be submitted via Interfolio, are welcome from scholars who have either a Ph.D. or equivalent degrees (including a J.D.), are standing faculty members at a college or university, and are on the tenure track but still untenured. Applications for the 2019-20 academic years will be reviewed on a rolling basis starting Monday, January 14, 2019. Applicants must include a cover-letter, three-page proposal, CV, and letters of support from their home department/institution. To receive full consideration, applications and letters of support should be received by that date.

From Russia's invasion of Ukraine and China's construction of artificial islands in the South China Seas to the global economic and political effects of new technologies and questions of how international institutions will handle diverse questions such as ISIS-driven mass killings, the post-Cold War global order may be at a tipping point. In addition, systemic trends such as globalization and climate change mean that the challenges of today and tomorrow will be global – and require global responses. The role of automated trading algorithms in the 2010 "Flash Crash" in the United States, combined with the specter of drone warfare around the world due and the proliferation of military robotics, highlight how the intersection of technologies such as cyber and robotics presents enormous challenges for global business and diplomatic norms. In a time of change, academic research has the potential to shed significant light on these issues, and highlight new and important approaches for the global policy community.

In this theme area, Perry World House will focus primarily, but not exclusively, on four areas: the implications of emerging technologies for global politics, shifting global power balances and how they influence both state and non-state actors, the evolution of international legal regimes, and the ability of the international community to sustain effective governing institutions in times of change.

#### Global Shifts

Urbanization, migration, and demographic changes are transforming the human environment, creating both new challenges and opportunities. The UN High Commission for Refugees said in 2015 that the

world faces the highest level of human displacement since its founding in 1950. New and changing migration patterns, whether driven by civil wars, instability due to environmental change, economic hardships, or potential opportunities elsewhere, have depth and nuance that have proven hard to predict – or track. At the same time, over 66% of the world's population will live in urban spaces by 2050, raising critical questions about urban vitality and sustainability.

Yet, the diverse causes and consequences of urbanization, migration, and demographic change have not been fully understood, and are too often examined in isolation. The University of Pennsylvania is poised to contribute to pressing policy debates and to help develop new approaches to these global shifts given the University's numerous strengths in urban studies, sociology, demography, law, and politics. The Global Innovation Program at Perry World House will bring together Penn's strengths in these areas through an interconnected examination of urbanization, migration, and demography.

#### Borders & Boundaries in World Politics

The Project on Borders and Boundaries in World Politics has two openings for post-doctoral research fellows for one year, renewable, full-time appointments. Fellows will split their time between their own research and work with a team led by Professor Beth Simmons, Andrea Mitchell University Professor in Law, Political Science, and Business Ethics. The Project is concerned with boundaries between organized human communities, broadly understood. International borders, border regions and border crossings have multiple significance as designations of state authority, security buffers, expressions of social meaning and opportunities for economic integration. Border regions and activities speak to national and local encounters with neighbors and the rest of the world. This project is concerned with how humans demarcate the space between "us" and "them." It contextualizes border architecture, infrastructure and institutions as expressions of various social, political and economic anxieties associated with globalization. This research team will concern itself with a broad range of questions relating to "bordering" in world politics. Applicants with an interest in territorial politics; migration and movement across borders; development in and across border regions; border crossing regimes, architectures and institutions; transnational migration; transnational crime, human trafficking and law enforcement across borders; and related issues are welcome to apply. Skills in empirical spatial analysis, GIS technologies, mapping technologies, experimental analyses, computerized textual and imaging analyses, and similar technologies are highly desirable, as are computer programming skills and experience using large computer databases and statistical software.

#### Requirements and Application Information

Postdoctoral fellows in Global Order and Global Shifts research areas will pursue their own research as well as participate in the intellectual life of the Global Innovation Program and Perry World House. Post-doctoral fellows will be expected to give a presentation during the academic year in the Perry World House Seminar Series, publish policy relevant scholarship related to Perry World House themes, and attend regularly scheduled seminars. They will also be expected to spend up to 10% of their time contributing to the intellectual environment at Perry World House, including working with Perry World House's Undergraduate Student Fellows, as well as designing and planning engagement in relevant theme areas. Perry World House will also introduce each postdoctoral fellow to related faculty and leaders of centers and institutes at the University of Pennsylvania. Applications are welcome from scholars who have received their Ph.D. or equivalent degrees (including a J.D. in the case of applicants focused on international legal regimes) in the last two years (not earlier than 2017), or who expect to complete their degree by June 2019. Applications will be reviewed starting Tuesday, January 8, 2019. To receive

full consideration, applications and letters of recommendation should be received by that date.

Upon provision of and contingent upon proof of conferral of the PhD degree, all postdoctoral fellow positions pay a stipend of \$53,000 plus relevant fees and health insurance. The position also provides \$2,000 in research support.

To apply, please go to:

- Global Order or Global Shifts: <http://apply.interfolio.com/56423>

## Princeton University

**Rank:** Fung Global Fellows Program - Early Career Scholar Fellowship

**Subfield(s):** Comparative Politics, International Relations, Other

Princeton University is pleased to announce the call for applications to the Fung Global Fellows Program at the Princeton Institute for International and Regional Studies (PIIRS). The program will select early-career scholars from around the world to be in residence at Princeton for an academic year and to engage in research and discussion around a common theme. The number of candidates hired at this rank will depend on the qualifications of the overall applicant pools. The fellowships will be awarded to scholars employed outside the United States who have a faculty appointment, a professional research appointment, or are an established independent scholar. They will also be expected to return to their positions at the conclusion of the fellowship. Lastly, they must have demonstrated outstanding scholarly achievement and unusual intellectual promise.

During the academic year 2019-20, the Fung Global Fellows Program theme will be "Thinking Globally." How people have thought about the planet has informed the institutions, norms, and policies that have pulled it together and torn it apart. For centuries, ideas of free trade, human rights or global governance have framed cooperation and competition, order and disorder. Such ideas have also spawned border-crossing movements, from campaigns to end slavery to commitments to reduce carbon emissions. In turn, global thinking and action have often reinforced commitments to national ideas and efforts to curb global exchange. The goal of this research theme is to explore how ideas framed the understanding of interests and the making of institutions that have yielded commonness and conflict across and within borders. We also want to understand how these ideas and practices came into being through scientific networks, foundations, and think tanks. The Program will also examine rival world ideas that have challenged prevailing orthodoxies. Nowadays, with cooperative norms under challenge, global institutions under stress, and a century of guiding ideas about global convergence in doubt, we want to take a broad look at where these ideas came from, their effects, and the prospects for intellectual renewal or rethinking. The goal of the 2019-20 Fung Global Fellows cohort will be to explore the ways people learned to rely on or to reject strangers far away, as well as to imagine how global relationships came to be and could be different. We welcome applicants from all disciplinary and inter-disciplinary fields from the sciences to the humanities whose work addresses this set of themes in any historical period or world region.

Applicants must apply online at <https://www.princeton.edu/acad-positions/position/9481>.

Applications are due by November 20, 2018 (11:59 p.m. EST). To be eligible, applicants must have received their Ph.D. or equivalent no earlier than September 1, 2009. Fellowships will be awarded on the strength of a candidate's proposed research project, the relationship of the project to the program theme, the candidate's scholarly record and ability to contribute to the intellectual life of the program. For more information on eligibility requirements and the Fung Global Fellows Program see <http://piirs.princeton.edu/funggf/>.

The following items will need to be submitted by the applicant, in English:

- Cover letter (1.5 pages maximum)
- Curriculum Vitae (including publications)
- Research proposal (maximum of 3 pages, single spaced)
- One writing sample (article or book chapter, maximum of 50 pages)
- An official letter from the applicant's current employer affirming that, should an offer be made, the applicant would be permitted to accept it and to spend the academic year 2019-2020 at Princeton University

### Princeton University

**Rank:** Fung Global Fellows Program - Early Career Scholar Fellowship

**Subfield(s):** Comparative Politics, International Relations, Other

Princeton University is pleased to announce the call for applications to the Fung Global Fellows Program at the Princeton Institute for International and Regional Studies (PIIRS). The program will select early-career scholars from around the world to be in residence at Princeton for an academic year and to engage in research and discussion around a common theme. The number of candidates hired at this rank will depend on the qualifications of the overall applicant pools. The fellowships will be awarded to scholars employed outside the United States who have a faculty appointment, a professional research appointment, or are an established independent scholar. They will also be expected to return to their positions at the conclusion of the fellowship. Lastly, they must have demonstrated outstanding scholarly achievement and unusual intellectual promise.

During the academic year 2019-20, the Fung Global Fellows Program theme will be "Thinking Globally: How people have thought about the planet has informed the institutions, norms, and policies that have pulled it together and torn it apart. For centuries, ideas of free trade, human rights or global governance have framed cooperation and competition, order and disorder. Such ideas have also spawned border-crossing movements, from campaigns to end slavery to commitments to reduce carbon emissions. In turn, global thinking and action have often reinforced commitments to national ideas and efforts to curb global exchange. The goal of this research theme is to explore how ideas framed the understanding of interests and the making of institutions that have yielded commonness and conflict across and within borders. We also want to understand how these ideas and practices came into being through scientific networks, foundations, and think tanks. The Program will also examine rival world ideas that have challenged prevailing orthodoxies. Nowadays, with cooperative norms under challenge, global institutions under stress, and a century of guiding ideas about global convergence in doubt, we want to take a broad look at where these ideas came from, their effects, and the prospects for intellectual renewal or rethinking. The goal of the 2019-20 Fung Global Fellows cohort will be to explore the ways people learned to rely on or to reject strangers far

away, as well as to imagine how global relationships came to be and could be different. We welcome applicants from all disciplinary and inter-disciplinary fields from the sciences to the humanities whose work addresses this set of themes in any historical period or world region.

Applicants must apply online at <https://www.princeton.edu/acad-positions/position/9481>.

Applications are due by November 20, 2018 (11:59 p.m. EST). To be eligible, applicants must have received their Ph.D. or equivalent no earlier than September 1, 2009. Fellowships will be awarded on the strength of a candidate's proposed research project, the relationship of the project to the program theme, the candidate's scholarly record and ability to contribute to the intellectual life of the program. For more information on eligibility requirements and the Fung Global Fellows Program see <http://piirs.princeton.edu/funggf/>.

## University of California, San Diego

### Rank: Postdoctoral Scholar

The Institute for Practical Ethics, a newly founded interdisciplinary research unit at the University of California, San Diego, is dedicated to the pursuit of socially responsible science. Forming connections among ethicists, social scientists, natural scientists, health professionals, and the community, it seeks to address ethical and social issues facing society, from ethical issues in clinical trials, environmental conservation, stem cell research, engineering and big data, and much more. Further information about the Institute can be found at [ipe.ucsd.edu](http://ipe.ucsd.edu).

Thanks to a generous grant from the Tata Foundation, one of the Institute's projects over the next few years will be focused on the Ethics and Social Implications of Active Genetics. "Active genetics" refers to new advances in genetic engineering, advances associated with more precise editing methods (e.g., through CRISPR-CAS9) combined with faster and more powerful ways of driving mutations through populations (commonly called a gene-drive). This emerging ability aspires to make progress in disease reduction, agriculture, and cancer research. For example, scientists are working on modifying a species of mosquito so that it cannot transmit malaria, along with a gene drive to ensure that this new mosquito quickly replaces the wild one. This technology's power to transform raises ethical issues and questions about social impact. The goal of this project is to anticipate and study these new issues. We are particularly interested in projects that will focus upon this technology's possible use in India.

To this end, the Institute has assembled an interdisciplinary research team of dissertation fellows, PhD candidates, postdoctoral scholars, and UC San Diego faculty who work in this area. Members of the research team plan and participate in a monthly meeting devoted to the science and ethics of active genetics; organize lectures, colloquia, round-tables, or other public events exploring the topic; and convene

at least one major international conference. Postdoctoral scholars are also expected to be working on their own major project that concerns active genetics. While there is no existing field of gene drive studies per se, we anticipate that scholars with expertise in related questions will be especially competitive. We anticipate successful applicants being from, but not limited to, the fields of philosophy, ethics, bioethics, sociology, science studies and anthropology.

Applicants are required to have a PhD in hand at the time of appointment. A degree in Political Science, History, International Relations, Economics, or allied field is anticipated but other specialties may be appropriate, depending on an applicant's interests and skills. Candidates will be assessed based on their expertise and knowledge of different key aspects of security studies and their ability to contribute to a diversified, integrated research team.

### About the University

CSU Dominguez Hills holds the Carnegie classification of Master's L and is a federally recognized Hispanic-Serving Institution. Class sizes are small as compared with large research universities and classes are taught by the faculty, not by teaching assistants. Many of the university's students are the first in their families to earn a university degree. While the university enrolls traditional full-time students, many students enroll part-time and attend late afternoon, evening and weekend classes because of work and family responsibilities.

CSU Dominguez Hills offers 44 undergraduate majors, 22 master's degrees, and a number of certificate and credential programs. Enrollment exceeds 14,600 students, and the student population is among

the most ethnically and culturally rich in the nation: 64.3% Hispanic/Latino, 13.4% Black/African-American, 8.5% White, 10.2% Asian or Pacific Islander, 0.1% American Indian, and 3.1% two or more races.

The University is accredited by the Western Association of Schools and Colleges (WASC), the accrediting body for institutions of higher learning in the West. In the 2018 WASC Educational Effectiveness Review, CSUDH was reaffirmed for a full 10 years. Twelve programs hold accreditations from national professional associations: business administration, clinical sciences, computer science, education, health science, music, nursing, occupational therapy, public administration, special education, theatre arts, and social work.

The academic programs of the university are organized under the Colleges of Arts and Humanities, Business Administration and Public Policy, Extended and International Education, Natural and Behavioral Sciences, Education, and Health, Human Services, and Nursing. While continuing to emphasize the liberal arts and sciences, professional programs offered at the undergraduate and graduate level, developed to serve the region's workforce needs, are of great interest to students and prepare them for professions in a variety of industries.

#### Faculty

A tradition of teaching excellence lies at the heart of the university experience for Dominguez Hills' students. Most of the faculty have earned doctoral degrees from prestigious universities across the nation. The faculty strives to sustain a dynamic teaching and learning environment in a multicultural setting. The Academic Senate provides a forum for faculty, administration, students and others to be represented and consulted regarding such vital issues as budget priorities, academic standards, curriculum and instruction, and student affairs.

#### Student Life

At CSU Dominguez Hills, there's more to student life than the classroom. The university offers a dynamic, interactive and enriching community of learners, teachers and peers sharing diverse points of view. There are multitudes of ways for students to pursue interests, get involved, and get the most from their academic experience.

An office of student life enhances student development by coordinating a variety of co-curricular activities, including 60 student organizations. Students are encouraged to perform community service and participate in leadership development. The Multicultural Center on campus promotes the exploration of diverse heritages, values and cultural experiences by offering a wide range of activities and programs throughout the academic year.

CSU Dominguez Hills is a National Collegiate Athletic Association (NCAA) Division II institution that competes in the California Collegiate Athletic Association (CCAA). CSU Dominguez Hills is one of the most athletically competitive and honored schools in the CCAA, with 23 conference titles and four national championships to date, including the 2008 NCAA D-II Men's Soccer National Championship. CSU Dominguez Hills sponsors 11 intercollegiate athletic teams.

#### The Location

The university is located in Carson, California, in the South Bay region of Los Angeles County. Its 346-acre park-like campus is situated in the historic Rancho San Pedro, the oldest Spanish land grant in the Los Angeles area. The site remained in the continuous possession of the Dominguez family for seven generations - from its inception in 1794 to its acquisition by the state of California.

#### The Region

The South Bay is one of the most culturally, economically, and ethnically diverse areas in the United States, with a largely even distribution of the population with African, Asian/Pacific Islander, European, and Latino ancestry. The university is located in the city of Carson, a city of 93,000 residents and one of the many municipalities that border the city of Los Angeles. Cultural, performance and sports venues in downtown Los Angeles are about 15 minutes away and the South Bay beach communities are a few minutes away to the west and south. The StubHub, a 125-acre sports center developed by AEG and home to LA Galaxy of Major League Soccer and Los Angeles Chargers, is located on the CSUDH campus.

The campus is strategically located in the heart of a major technological, industrial and transportation complex in Southern California. This area includes the massive Port of Long Beach and the Port of Los Angeles – Southern California's gateway to international commerce. The South Bay region is also home to aerospace, oil refinery, healthcare and automotive industries.

### Stanford University

**Rank:** Postdoctoral Fellow

**Specializations:** Political Philosophy & Theory, Political Theory, Normative Political Theory

For 2019-20, the McCoy Family Center for Ethics in Society seeks to appoint up to four postdoctoral fellows. Selected fellows will be designated as either General Ethics Fellows or Interdisciplinary Ethics Fellows. The two types of fellows have some distinct training opportunities and responsibilities, but they form a common community at

the Center and participate together in the Center's intellectual life. The programs are described in detail below. All applicants will be considered for both types of fellowships and do not need to tailor their application for one or the other fellowship.

#### General Ethics Fellowship

Some selected fellows will be part of our longstanding postdoctoral program that is open to candidates with substantial normative research in any area within philosophy or political science. For 2019-20, we are especially interested in candidates with research interests in technology, inequality, global justice and environmental ethics, but we welcome all applicants with strong normative interests. Applicants must have normative training and hold a PhD in philosophy or political science. Scholars with a Ph.D. in Law will also be considered so long as their work focuses on ethical dimensions of public policy or law. General Ethics Fellows participate in the intellectual life of the Center for Ethics in Society (attend weekly workshops; events; professional training opportunities), teach one class per year, interact with undergraduates in the Ethics in Society Program, and contribute to an interdisciplinary ethics community across the campus.

#### Interdisciplinary Ethics Fellowship

2019-20 will be the fourth year of this fellowship program at the Center, and for the first time, the Stanford Human-Centered Artificial Intelligence (HAI) Initiative will join as a partner center (<https://hai.stanford.edu>). The program is rooted in the commitment of the Center for Ethics in Society to bringing ethical reflection to bear on pressing social problems. Addressing many of these social problems involves knowledge of the work of social science, law, engineering, and the life sciences. The premise of this program is that the normative scholarship of our fellows will be enhanced by engagement with empirically-oriented scholars. To that end, each fellow in the program will be matched with a partner research center at Stanford that is dedicated to interdisciplinary research, including the HAI initiative and other campus centers depending on applicants' interests. For 2019-20, we are especially interested in candidates with research interests in artificial intelligence, computer science, or biomedical ethics, but all applicants whose work may intersect with empirically-oriented scholarship will be considered. Applicants need not name a possible partner center on campus or tailor their materials for this type of fellowship. The Interdisciplinary Ethics Fellows and partner centers will be selected based on the natural match between their work.

Applicants must have normative training and hold a Ph.D. in Philosophy or Political Science. Scholars with a Ph.D. in Law will also be considered so long as their work focuses on ethical dimensions of public policy or law. Fellows will participate in the regular intellectual life of the partner center and the Center for Ethics in Society (e.g., attend weekly workshops; events; professional training opportunities), interact with undergraduates in the Ethics in Society Program, and contribute to an interdisciplinary ethics community across campus.

#### Appointment Requirements and Application Details

For both types of fellowships, the appointment term is Sept. 1, 2019 to Aug. 31, 2020. The initial term may be renewed for an additional year. Applicants must have completed all requirements for their Ph.D. by June 30, 2019. Candidates must also be no more than three years from the awarding of their degree (i.e., September 2016).

Stanford University is an equal opportunity employer and is committed to increasing the diversity of its scholarly community. We welcome applications from women and members of minority groups, as well as others who would bring additional dimensions to the university's research and teaching missions. Salary is competitive.

Applicants should submit a cover letter, CV, a writing sample (no more than 25 pages double-spaced), three letters of recommendation, a one-page research statement (single spaced), and list of classes they have taught and/or are prepared to teach. Additional materials will not be considered. All applicants will be considered for both types of fellowships, and finalists will be consulted about whether they may be designated as Interdisciplinary Ethics or General Ethics fellows.

Applications will be collected via Interfolio. Applications will not be accepted by email. Please visit the Center's website for information about how to submit your materials: <https://ethicsinsociety.stanford.edu/postdocs/application-process>

If you have questions, please email [ethics\\_submissions@stanford.edu](mailto:ethics_submissions@stanford.edu). Application Due Date: December 10, 2018.

If you have an offer from such an academic institution, and are interested in this Postdoctoral Fellowship, we will be happy to support discussions with your home institution for either deferring your start date or for starting in your position but going on unpaid leave to take this opportunity to build your research pipeline.
